

RF & MICROWAVE INSTALLATION & COMMISSIONING EQUIPMENT

We do installations of RF technologies of GSM, UMTS and W-CDMA including all the latest technologies for deployment of mobile networks. Validation of correct electrical equipment is done also including the running, labelling and securing cables.

We install and commission Microwave equipment. These installation services include Rooftop, tower or monopole locations. We align and test antenna links ensuring precise alignment at both end of the link.

** Installation of indoor networks are rolled out with managed our services. These include installation and commissioning of DAS indoor sites, BTS and more.
