ANJUR EKAR TELCO DIVISION

ANJUR EKAR obtained **Network Facilities Provider (NFP)**, **Network Service Provider (NSP)** and **Application Service Provider (ASP)** licenses from the Malaysian Multimedia Communications Commission (MCMC).

As an accomplished **Bumiputera** corporation, the company has since grown its market share in enabling and enhancing its services to ensure versatile and customizable offerings going into Industry 4.0; driving solutions and supporting clientele both locally and globally, including those from the oil & gas, **telecommunication**, agriculture, and energy industries. From the conceptualization of a project right up to after-sales service, we are committed to continuously strive to be the market leader for the industry in providing premium quality and business excellence for our clientele

Leveraging on our vast expertise and technological innovations, Anjur Ekar Sdn Bhd looks to expand its footprint in providing key network infrastructure and service content solutions for clients across the nation

RF & MICROWAVE INSTALLATION & COMMISSIONING EQUIPMENT

We do installations of RF technologies of GSM, UMTS and W-CDMA including all the latest technologies for deployment of mobile networks. Validation of correct electrical equipment is done also including the running, labelling and securing cables.

We install and commission Microwave equipment. These installation services include Rooftop, tower or monopole locations. We align and test antenna links ensuring precise alignment at both end of the link.

** Installation of indoor networks are rolled out with managed our services. These include installation and commissioning of DAS indoor sites, BTS and more.

IN BUILDING COVERAGE

In-Building Coverage or IBC is where a DAS is deployed/ installed inside a building to provide cellular/ mobile **coverage** and **capacity**.

- A *distributed antenna system* or DAS, is a network of spatially separated antenna nodes connected to a common transport medium – typical coax or fiber optic cable, that provide wireless service within an geographic area/ building or structure
- The DAS can be driven by a direct connection to a radio base station or an “off-air” repeater/ signal booster
- A DAS may be deployed indoors (iDAS) or outdoors (oDAS)

OPERATION & MAINTENANCE

•DEDICATED ACCOUNT MANAGEMENT

- A Service Supervisor and an Account Manager are assigned to oversee every contract. They will ensure the Service Level Agreement is met and act as liaison for monthly meetings and reporting.

•MAINTENANCE & SUPPORT

- Anjur Ekar provide prompt request resolution, minimizing downtime and promoting smooth business delivery. Backup equipment critical to operations will be stocked at our strategically located nationwide service centers to increase availability in time of need.

•REGULAR INSPECTION

- Anjur Ekar engineers perform regular standardized inspection of network equipment to gauge its performance and wear. These inspections identify potential points of failure before an event occurs, precipitating timely maintenance actions to avoid unexpected downtime.

•CORRECTIVE MAINTENANCE

- Anjur Ekar perform Corrective Maintenance on all items where the consequences of failure or wear are not significant, as long as the cost of the maintenance is not greater than Preventative Maintenance.

•PREVENTATIVE MAINTENANCE

- Anjur Ekar perform Preventative Maintenance to preserve and enhance equipment reliability. Our processes include both partial and complete overhauls of specified periods; engineers record equipment deterioration and monitor their condition to assign maintenance activity before it is required.

•RETURN MERCHANDISE AUTHORIZATION (RMA)

- Anjur Ekar provide Return Merchandise Authorization services, including sending/receiving materials, recording serial information, packaging, shipping, documentation, tracking and updating of records. This end-to-end service dictates the processes for returning equipment to our principal for servicing/replacement, providing customers with peace of mind.

•QUALITY ASSURANCE

- Anjur Ekar Service Level Agreements seek to provide our customers with total clarity regarding the services, priorities, responsibilities, guarantees and warranties that are provided by our contracts. Each area of our services is broken into well-defined levels, based on availability, serviceability, performance, operation, or another attribute of that service.
